## SOME RANDOM ANSWERS TO DESCRIPTIVE QUESTION;

*"What do you think DREAM is?"*

On the other hand the other kind of dream always give you a certain hope and make you believe that one day I might come true and the hope gives you the energy to plan for it and you spend the rest of your life try to make that true

I believe that a person without dream cannot live correctly because dreams make our life and even our thought dream has no limit it could be having a pen or it could be immortality you chose it yourself

I believe dreams are what makes us human because they give us a purpose to live for and a goal to achieve so if we don't dream ,if we don't wish for something better for something that we truly desire then we're not alive

I used to think about what dream is a lot. We all know ourselves and our abilities so if you ask me I would say a dream is something you know with your abilities and all you can achieve. Considering life as a stairs from where you standing top stairs can be name as dreams You may stand on the first stair But The tenth stair can be your dream When you Reaching the 10th stair you would think about top stairs and after that you will have some other dreams

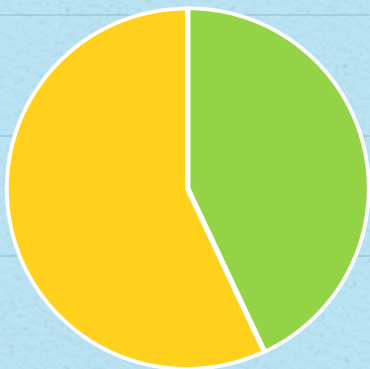

In my point of view dream is a collection of thoughts and desires which may seem impossible but deep down you feel you can achieve them and the most significant point about dream is that they must have the ability to connect your soul and make you feel better every time you think about them

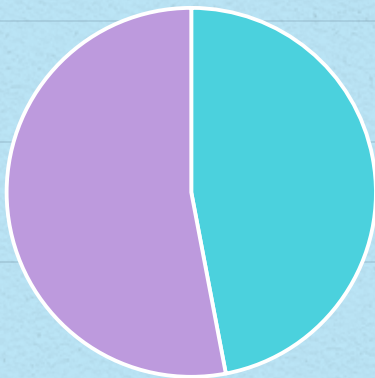

Would you rather to spend a hard time to create your future now or take baby steps?
